REMEDIAL SITE ASSESSMENT DECISION - EPA REGION 3

ORIGINAL
(Red)

Site Name: D.C. Convention Center Site.

EPA ID#: Dcs FN0 305 429

DSN: _____

Alias Site Names: _____

City: Washington, D.C.

County: Washington, D.C.

State: DC

Refer to Report Dated: _____

Report type: _____

Report developed by: _____

DECISION:

|| 1. Further Remedial Site Assessment under CERCLA (Superfund) is not required because:

|| 1a. Site does not qualify for further remedial
site assessment under CERCLA
(No Further Remedial Action Planned - NFRAP)

|| 1b. Site may qualify for further
action, but is deferred to: || RCRA
|| NRC

|| 2. Further Assessment Needed Under CERCLA:

2a. (optional) Priority: || Higher || Lower

2b. Activity || PA || ESI
Type: || SI || HRS evaluation

|| Other: _____

DISCUSSION/RATIONALE:

D.C. Convention Center Site, 801 M Street, NW, Washington, D.C. 20001

D.C. Convention Center Site, DCS FN0 305 429

On December 15, 1998, Regional Administrator (RA) W. Michael McCabe received a complaint regarding unpermitted dumping of potentially hazardous material at the future site of the Washington, D.C. Convention Center. The July 1998 dumping was the 30 truck loads of construction debris on the 300 ft. x 150 ft (1.03 acres). The soil samples showed that the debris contained hazardous substances including lead, mercury, cadmium, chromium, barium, and arsenic. Prior to the unpermitted dumping, the future DC Convention Center location's former uses included several gas stations and similar industrial properties with 33 historic underground storage tanks (several of which had been determined to be leaking). While the illegal dumping clearly did occur, the site has since been remediated and did not reflect a hazardous substance migration. Based on the DCEHA and the DCCA's appropriate steps handling of stained soil and debris, the DCCA's commitment (to the proper worker protection, the dust control measures, and the disposal efforts), the DCEHA's regulatory control over the planned construction and remediation of the site, the Site Assessment program designates this site's status as no further response action planned (NFRAP).
